

## Ruigang Jiang

(607) 312-0570 | ruigang.jiang@alumni.emory.edu | Atlanta, GA, 30306 <https://www.linkedin.com/in/ruigang-jiang-68bb002ab/>

### Objective

---

Seeking full-time or internship position in Data Analysis and Business Intelligence

### Education

---

**Emory University, Rollins School of Public Health, Atlanta, GA** Aug 2024 - Present

*Master of Public Health in Biostatistics* – Expected Graduation: May 2026 GPA: 3.93/4.00

**Binghamton University, State University of New York, Binghamton, NY** Aug 2020 - May 2024

*Bachelor of Art in Mathematical Science* GPA: 3.52/4.00

### Professional Experience

---

***Analytics Intern***, Jiangsu International Data Port - Nanjing, China Jun 2024 - Aug 2024

- Assessed the feasibility of joining the International Data Space Association by analyzing membership requirements and alignment with the company's data strategy.
- Participated in project management on public-private partnerships at Jiangsu International Data Port.
- Advised prospective corporate tenants on selecting supporting model suppliers for cooperation for establishing Xuanwu Large Language Models (LLMs) research facility.

***Business Communication Intern***, Nanjing Longtan Railway Co.Ltd - Nanjing, China Jun 2023 - Aug 2023

- Maintained effective communication with customers and railway companies to ensure timely delivery of goods through efficient scheduling and intermodal transfers.
- Co-developed an online logistics system leveraging existing data to streamline operations.

### Leadership and Service

---

***Mentor***, Binghamton University - Binghamton, NY Aug 2023 - Dec 2023

- Assisted non-native-speaking students in campus resources navigation and environment adaptation.

***Teaching Assistant***, Binghamton University - Binghamton, NY Jan 2023 - May 2023

- Collaborated with faculty members to facilitate interactive discussions and provided feedback to enhance student engagement and performance.

***National Mathematics Honorary Society***, Binghamton University - Binghamton, NY Apr 2022 - May 2023

- Collaborated with members to solve complex mathematical problems and exchange advanced ideas.

### Research Experience

---

***Cancer Symptom-Management RAG System***, Emory University – Atlanta, GA Apr 2025 – Dec 2025

- Build a 4-stage pipeline: SEM antecedent extraction; symptom severity; RAG + MMR retrieval; COM-B guided personalization across pre/active/post-treatment.
- Benchmarked four LLMs (GPT-4.1, Claude-Sonnet-4, Deepseek-Reasoner, Llama-3) on the same dataset with a unified protocol, evaluating relevance/consistency vs. cost-latency trade-offs.
- Outcomes: Top-k precision, duplication, clinician usability, robust across multiple cancers, personas, and phases.

***Dietary Assessment based on LLMs***, Emory University – Atlanta, GA Aug 2025 – Jan 2026

- Based on the same prompts/settings, test whether GPT-4.1, Claude-Sonnet-4, Deepseek-Reasoner, and Llama-3 can give accurate meal assessments based on the user's text description.
- Multimodal evaluation using GPT-4.1, Claude-Sonnet-4, DeepSeek-VL2, and LLaVA-Next under the same prompts/settings to test whether accurate dietary assessment can be made based on user-provided image information.

***LLM-Powered WASH Risk Assessment System***, Emory University – Atlanta, GA Oct 2025 – Present

- Developed an LLM-powered conversational survey system for adaptive collection of household-level WASH risk factors.
- Designed a multi-domain risk framework with Pydantic-based structured data extraction and RAG-driven contextual reasoning.
- Built and deployed an end-to-end system (Python, Gradio) with real-time interaction, validation, and interpretable risk scoring.
- Evaluated performance via simulations, assessing completion rate, consistency, and robustness vs. traditional surveys.

### Certificate

---

***Data Science Graduate Certificate***, May 2026

Emory University Rollins School of Public Health
