(607) 312-0570 | ruigang.jiang@alumni.emory.edu | Atlanta, GA, 30306 <https://www.linkedin.com/in/ruigang-jiang-68bb002ab/>

Education

Emory University, Rollins School of Public Health, Atlanta, GA

Aug 2024 – May 2026

Master of Public Health in Biostatistics

Coursework: Data Science Toolkits, Machine Learning, Biostatistical Methods, Regression Analysis, Survival Analysis

Binghamton University, State University of New York, Binghamton, NY

Aug 2020 – May 2024

Bachelor of Art in Mathematical Science

Coursework: Data science, pure mathematics, actuarial, R Toolkits, Python programming

Skills

- Programming: Python, R, SAS, SQL, Git/Github.
- AI & Machining Learning: RAG, Prompt Engineering, Retrieval-Augmented Generation (RAG), Natural Language Generation, API Development, Human-Centered AI, Multimodal AI Applications.
- Data Visualization: GIS, Tableau, Plotly, ggplot2, Shiny.

Professional Experience

Analytics Internship, Jiangsu International Data Port - Nanjing, China

Jun 2024 – Aug 2024

- Assessed the feasibility of joining the International Data Space Association by analyzing membership requirements and alignment with the company's data strategy.
- Participated in project management on public-private partnerships at Jiangsu International Data Port.
- Advised prospective corporate tenants on selecting supporting model suppliers for cooperation for establishing Xuanwu Large Language Models (LLMs) research facility.

Logistics Data Analyst Internship, Nanjing Longtan Railway Co.Ltd - Nanjing, China

Jun 2023 – Aug 2023

- Co-developed an online logistics system leveraging existing data to streamline operations and facilitate end-to-end operations.
- Maintained effective communication with customers and railway companies to ensure timely delivery of goods through efficient scheduling and intermodal transfers.

Research Experience

Cancer Symptom-Management RAG System, Emory University – Atlanta, GA

Apr 2025 – Dec 2025

- Build a 4-stage pipeline: SEM antecedent extraction; symptom severity; RAG + MMR retrieval; COM-B guided personalization across pre/active/post-treatment.
- Benchmarked four LLMs (GPT-4.1, Claude-Sonnet-4, Deepseek-Reasoner, Llama-3) on the same dataset with a unified protocol, evaluating relevance/consistency vs. cost-latency trade-offs.
- The RAG system ultimately produces the following to help patients improve their treatment process: Top-k precision, duplication, clinician usability, robustness across multiple cancers, personas, and phases.

Dietary Assessment based on LLMs, Emory University – Atlanta, GA

Aug 2025 – Jan 2026

- Based on the user's text description, with the same prompts/settings, test whether GPT-4.1, Claude-Sonnet-4, Deepseek-Reasoner, and Llama-3 can give accurate meal assessments.
- Based on user-provided image information, multimodal evaluation using GPT-4.1, Claude-Sonnet-4, DeepSeek-VL2, and LLaVA-Next under the same prompts/settings to test whether accurate dietary assessment can be made.

LLM-Powered WASH Risk Assessment System, Emory University – Atlanta, GA

Oct 2025 – May 2026

- Developed an LLM-powered conversational survey system for adaptive collection of household-level WASH risk factors.
- Designed a multi-domain risk framework with Pydantic-based structured data extraction and RAG-driven contextual reasoning.
- Built and deployed an end-to-end system (Python, Gradio) with real-time interaction, validation, and interpretable risk scoring.
- Evaluated performance via simulations, assessing completion rate, consistency, and robustness vs. traditional surveys.

Certificate

Data Science Graduate Certificate, May 2026

Emory University Rollins School of Public Health

Honors

Dean's List, Fall 2020 & Spring 2021 & Spring, Fall 2023

Binghamton University, SUNY
